Memo: Announcement of Strategic Partnership

For Immediate Release

Penner Farm Services Group (PFSG) and Western Ag Systems (WAS) are pleased to announce a strategic partnership to expand our agricultural offerings across the prairie provinces.

Our common desire to help our farming partners realize their visions and dreams, along with complementary lines of equipment, expertise and knowledge were important factors considered in this decision. Every poultry, livestock and grain customer will benefit from our commitment to providing best in class service and delivery in Manitoba, Saskatchewan and Alberta.

Our commitment to the market remains the same – PFSG and WAS will continue to focus on placing the needs of our customers first, while striving to be the industry's choice for products and services. This partnership will allow us to focus on broadening our product and service offerings to our existing markets, while investing with intention in future markets. Our customers and suppliers will be the primary beneficiaries of our combined knowledge, abilities and geographic focuses.

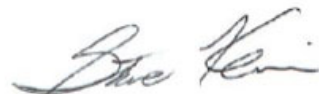

On behalf of PFSG and WAS, we thank our employees, our customers and our suppliers for their loyalty and confidence as we create stronger opportunities for our mutual growth and success.
